

A comfortable and cozy armchair, whose strong personality is expressed through the metal mesh shell. There are several ways to customize Arkys: the metal supporting structure comes in seven colours, which can be freely combined with the seven colours of the seat. Arkys can also be “dressed” with a cushion and a backrest-cover in a fabric which is also suitable for outdoor use. Many combinations can be created according to the needs and tastes of the customer and Arkys will become the protagonist of any interior space, with its rich and welcoming look, or an elegant and original piece of furniture in the outdoor. The chair is entirely made of anti corrosion coated steel, powder-coated to ensure high resistance to atmospheric agents.

ARKYS

AN ARMCHAIR DESIGNED BY

JEAN-MARIE MASSAUD

code	description
J1S2KC	Arkys armchair indoor/outdoor
J1S2C9K	Arkys seat cushion
J1S2S1K	Arkys backrest cushion
