

The eu/canistro sofa has a clear and spontaneous appeal, with a fresh and contemporary allure. The main features of the product are the unexpected softness and extreme comfort of the seat and the wide possibility of customization by matching materials and colours. The structure of the sofa is available in 4 colours and 2 finishings: indoor and outdoor. The outdoor version is in powder coated stainless steel to ensure the maximum resistance to atmospheric agents. The seat cushion is included in the target price, while the back rest cushions are quoted separately and can be ordered freely in quantity, size (two sizes available), colour and fabric. The eu/canistro backrest copies the beam-like style of the eus table and recalls the lines of the eu/phoria chairs, thus completing a rich family of matching products.
