

The collection of folding chairs Xenia revolves around three variations: a chair with armrests, an armchair, a lounge armchair. To which is added a practical footrest. Xenia's welcoming seat and fine textiles speak of home and interior furnishing (living, kitchen, occasional seating). At the same time, its outdoor materials and practical folding structure allow enjoying it in outside settings (garden, terrace, poolside). The frame, in powder-coated stainless steel and die-cast aluminum, is available in 5 colours. Seat, back-rest and armrests, in soft polypropylene fabric (resistant, washable and suitable for outdoor use), are padded to ensure maximum comfort and are provided in 11 chromatic variations. All the versions of Xenia can be ordered with or without the armrests' covers. The optional rear and side pockets are connected to the armrests by a practical hidden strap system. The armchair and the lounge armchair are also available with long upholsteries, which entirely cover the sides of the frame, what turns Xenia into a rich and refined indoor armchair. All textile components are easily removable to allow for washing and possible fabrics renewal. In line with eumenes philosophy, Xenia can be customized by freely choosing colors and textiles of each part of the product (frame, seat and backrest cushion, armrests' covers, pockets).
